

**SECTION 4**  
**EXISTING SCHOOL FACILITIES**

## **ELEMENTARY STATE RATED CAPACITY**

1. State capacity shall be based on the same number of regular classrooms as local capacity, calculated at 23 students per classroom.
2. Kindergarten is calculated based on the formula of 22 students/classroom.
3. Modified self-contained or self-contained special education services such as prep, early intervention kindergarten, and structured learning environment are provided within a special education class within a school. The classroom within the school dedicated for this function is counted as a special education capacity (10 students/room). These students are included in FTE enrollments and projections in order to make equitable capacity comparisons.
4. Pre-kindergarten classroom capacity is based on 20 students per classroom.

## **ASSUMPTIONS: SECONDARY CAPACITY MIDDLE SCHOOLS - STATE CAPACITY**

1. All specialized classrooms: rooms such as science laboratories, career technology education (CTE) rooms, classrooms for English for speakers of other languages, distance learning rooms, business education rooms, computer laboratories, band and chorus rooms, art rooms, family and consumer sciences rooms, weight rooms, and wrestling rooms.
2. Gymnasiums: The number of teaching stations in a gymnasium is calculated by dividing the net square footage by 6,000 nsf, rounding the quotient to the nearest whole number, and multiplying the result by two (2). According to national standards a 6,000 nsf gymnasium is a mid-size gymnasium that supports interscholastic basketball games and includes appropriate safety zones.
3. Self-contained special education classrooms: rooms that are used by students receiving special education services outside the general education setting for more than 60% of the school day.
4. Open-space classrooms: rooms in instructional areas in which the classrooms are not structurally defined, with or without temporary partitions. The number of classrooms in an open-space area is calculated by dividing the net square footage of the open space area by 800 net square feet and rounding the quotient to the nearest whole number.
5. Partially enclosed classrooms: rooms in which instructional areas are structurally defined by permanent (non-removable) partitions.
6. Instructional Suites. A suite is a cluster of rooms typically assigned to one teacher for one class period, such as a career technology classroom, its computer room, and its laboratory, and shall be counted as a single teaching station.

## **MIDDLE SCHOOLS - FUNCTIONAL CAPACITY**

1. Middle school students are organized in teams. The team is composed of 4-5 teachers and 125-150 students. The program consists of a core curriculum (language arts/English, math, science, and social studies) and an exploratory curriculum of physical education, art, music, band, computers, technology, and foreign language.
2. Capacity calculations shall be based on 25 students per teaching station for core curricular programs.
3. Modified self-contained or self-contained special education services such as special needs are provided within a special educational classroom within the school. The classroom(s) within the school dedicated for this function is counted as a special education capacity (10 students per room). The special education capacity is listed separately from regular capacity.
4. Each middle school shall have at least one room designated as a special education resource room for providing direct special education services to students with learning disabilities and/or handicapping condition not in excess of an average of three hours per school day. An additional room shall be designated as a reading resource room. These rooms are usually less than the 600 square foot classroom minimum.
