BOARD POLICY IGAC: ABSTINENCE POLICY STATEMENT

The middle school and high school Health curriculum provides the certified health educator opportunities to address the state health framework, county outcomes, and program objectives. Within the curriculum, essential outcomes are identified for each unit. The unit of “human sexuality” supports the Board of Education policy regarding abstinence from sexual activity as the appropriate behavior before marriage. The curriculum for grades 6, 7, 8, and the Health I courses contain specific behavioral and lesson objectives that support the abstinence policy.
