**CARROLL COUNTY PUBLIC SCHOOLS  
ADMINISTRATIVE REGULATIONS**

**BOARD POLICY IGAD: ALCOHOL AND DRUG EDUCATION INSTRUCTIONAL  
PROGRAM**

---

The basic objective of an alcohol or drug abuse educational program is to prevent the development of individual abuse through an objective presentation of all applicable facts, and to guide students who experiment with or abuse substances toward knowledge and understanding, and toward rehabilitation.

Basic to any abuse prevention program is an honest approach concerning the dangers of the problem. Learning must start early and continue throughout a student's educational years. Its nature should be informative and factual. Sermonizing should be avoided.

The facts concerning the effects of chemical abuse are the first steps toward enlightenment and mature behavioral value judgments. Curriculum pertaining to alcohol/drug education is available in our system K-12. Resources and materials can be obtained by contacting the supervisor of health.
