Science Observation Journal

Directions: While you are having an unexpected break from school, it is still important to view the science in the world around you. Make observations around you-write what you see below in the journal-and explain how it relates to your science classes.

Date: _____

Observation-what did you see? Be specific-use at least two complete sentences!

How did what you see relate to your science class? Be specific-think of our vocabulary words, formulas, etc.
